Neomycin Sulphate 0.5% w/w

Read this Patient Information before using this cream and each time you get a refill. This leaflet does not replace the advice of your healthcare provider.

What is this Cream used for?

This combination cream is formulated for the treatment of mixed skin infections involving fungal and bacterial pathogens, accompanied by inflammation and itching.

Key Benefits:

- **Clobetasol Propionate:** A potent corticosteroid to relieve inflammation, redness, and itching
- **Clotrimazole:** Broad-spectrum antifungal effective against dermatophytes and Candida
- **Neomycin Sulphate:** Antibiotic for superficial bacterial infections of the skin

Who should not use this Cream?

Do not use if you:

- Are allergic to any of the ingredients
- Have untreated viral infections (e.g., herpes, chickenpox)
- Are pregnant or breastfeeding (unless prescribed)
- Intend to use on the face, groin, or underarms without medical supervision

Who can use this Cream?

Adults and Children 12 Years and Older:

- Safe when used as directed
- Avoid prolonged use or application over large skin areas

Children under 12 Years:

- Use only under medical guidance
- Increased risk of side effects with improper use

What should I tell my healthcare provider before using this Cream?

Before using this product, inform your provider if you:

- Have existing skin conditions (e.g., eczema, psoriasis)
- Are on other topical or oral medications
- Are pregnant or planning pregnancy
- Are breastfeeding

How should I use this Cream?

- Wash and dry the affected area
- Apply a thin layer of cream to the skin, once or twice daily
- Avoid bandaging unless prescribed
- Do not use near eyes, mouth, or mucous membranes
- Wash hands after each application (unless hands are being treated)
- Do not use for more than 2 weeks continuously

Possible Side Effects:

Common:

- Temporary stinging, burning, or redness
- Dryness or mild skin irritation

Rare or Serious:

- Allergic reactions (rash, swelling, difficulty breathing)
- Skin thinning, stretch marks, or pigment changes with long-term use
- Risk of developing resistance with prolonged antibiotic exposure

How should I store this Cream?

- Store below 25°C (77°F)
- Do not freeze
- Keep away from direct sunlight and out of reach of children
- Important Precautions:
- For external use only
- Do not use on broken or oozing skin unless directed
- Avoid prolonged or repeated use without medical supervision
- Not suitable for long-term cosmetic use

What are the ingredients in this Cream?

Active Ingredients:

- **Clobetasol Propionate** – Potent anti-inflammatory corticosteroid
- **Clotrimazole** – Antifungal effective against Candida and dermatophytes
- **Neomycin Sulphate** – Antibiotic targeting Gram-positive and Gram-negative bacteria

Inactive Ingredients:

- Cream base, Emulsifiers, Preservative
